This course is mandatory for all degree-seeking and exchange students.
BA-05-BETHIC-CL	Business Ethics	Core courses	English	Fall (Sept-Dec)	6	This course is intended as an introduction to general ethics, and more especially to business ethics. Ethical considerations have come to the forefront in corporations and in legal regulations, as well as in business schools, over the past few years, and business ethics has been the site of immense changes since the beginning of the third millennium. Recent scandals and international crises have proven that the “bottom line” for corporations involves more than just making profits: in order to succeed, a company needs to adopt ethical behaviour and strategies, beyond the limits of the merely “legal”. Government policies are also taking ethics seriously today, defining what before were common business practices, authorised by liberal economics and free-market mentality, as crimes against society, individuals, stakeholders and consumers, subject to severe sanctions. But business ethics is not merely about company policies, and involves workers at all levels of a corporation’s hierarchy. Ethics deals with how people ought to act, what is right and wrong, acceptable and unacceptable behaviour. However, the limits of these judgments are sometimes exceedingly difficult to distinguish, especially in the corporate world where private human interests are subjected to the greater needs of the workplace.
