Economics and Finance (EF)

Educational goals and Career opportunities

The Master in Economics and Finance puts great emphasis on the economic methodology and quantitative tools

The course provides a rigorous program that prepares graduates to work in international and national contexts in

- Banking/Financial sector
- Central banks/international organizations
- Companies
- Public and private research centers
- Ph.D. in economics

Our offer, comparatively

- An integrated study of Economics and Finance is common in many Masters programs in EU
- Vice versa, a master in Economics and Finance is unique for Italy
 - ✓ Many Italian universities offer masters either in Economics or in Banking and Finance, the latter being typically business-oriented
- We take advantage of the current MEF reputation, and with the addition of a stronger curriculum in Economics we also compete with Universities offering degrees more focused on Economics

Two curricula: Economics, Banking and Finance

Two distinct curricula....

- Economics
- Banking and Finance

...but several common courses to both curricula:

Analytical tools and advanced notions in economics, econometrics and finance

MEF compared to other Masters at DSEA:

How MEF differs from **MBA**
(curriculum Accounting and Finance)

- MEF addresses banking / financial issues with quantitative instruments and economic models
- MEF focused on markets and intermediaries

How MEF differs from **MEI**

- MEF addresses economic issues with strong quantitative and modelling emphasis
